About Me

I'm a passionate python programmer with experience in web development using Python, Django, HTML, CSS. I have a solid understanding of software engineering principles and a knack for writing clean, efficient, and maintainable code. During my studies, I have developed a strong interest in web development, particularly in back-end development, and have completed several projects using Django.

I'm a quick learner and enjoy collaborating with other developers to solve challenging problems. I'm confident that my skills and experience make me an excellent candidate for internship/entry level roles, and I'm eager to contribute my knowledge to your team.

Projects

- **Developed a blog website, which allows users to create and delete posts. The system includes features such as user authentication and authorization, email notifications for forgotten password resets, and pagination.**
- **Built an e-commerce website using Django, Javascript, HTML and CSS which includes features such as product catalog, shopping cart, product details page with images, descriptions, and related items to contact the seller.**
- **Created a social media application using Django, which allows users to create posts, follow and unfollow other users, chat with users that they follow and comment on posts posted by users that they follow as well as get a feed of posts from their followings.**

Relevant Skills

- Python
- Django
- Flask
- HTML
- CSS
- Problem Solving

Certifications:

100 Days of Code: The Complete Python Pro Bootcamp for 2023 on 11/07/2022 as taught by Dr. Angela Yu on Udemy.
